SUMMARY

Security analyst candidate focused on turning vulnerability and systems data into clear remediation priorities, risk insights, and stakeholder-ready reports. Hands-on work includes Python-driven SAST reporting, migration risk mapping for a healthcare client, and monitoring and approval-gate automations.

SKILLS

- | | | |
|--------------------------------------|-----------------------|-----------------------------|
| • Vulnerability management | • Security automation | • Approval workflows |
| • SAST report ingestion and analysis | • Risk assessment | • Stakeholder communication |
| • Excel / XLSX automation | • Structured logging | • Security documentation |
| • Python | • Alerting | |

EXPERIENCE

Nonprofit Healthcare Organization, Project Consultant

2026-01 – 2026-05 • Tulsa, OK

- Mapped existing workflows and the technology environment to security, privacy, and implementation risks during a planned migration to a new stack.
- Presented migration risks, security considerations, and rollout recommendations to technical and non-technical stakeholders to clarify vulnerabilities and escalation paths.

Self-directed / Independent, Security Automation Projects

2026-01 – Present • Remote

- Designed automation workflows for vulnerability discovery and remediation tracking using structured logs, alerting, and approval gates to improve visibility across automated systems.
- Built monitoring and approval-gate workflows to detect automation failures, flag risky actions, and route remediation steps through human review.

Dillard's, Information Security Intern

2025-05 – 2025-08 • Little Rock, AR

- Helped build a SAST reporting workflow that converted GitLab scanner output into clean Excel reports with severity breakdowns, repository and team views, and visual summaries stakeholders could act on.
- Correlated vulnerability details such as severity and logging dates to give clearer visibility into remediation priorities.
- Translated technical vulnerability findings into actionable reporting for decision-makers.

Accurate Interpretations, Technical Operations Intern

2024-05 – 2024-08 • Lawton, OK

- Performed onsite network traffic analysis with Wireshark to identify anomalies, support troubleshooting, and strengthen secure network operations.

EDUCATION

Bachelor of Science in Computer Information Systems , The University of Tulsa	in progress, expected 2026-05
Master of Science in Cybersecurity , The University of Tulsa	in progress, expected 2026-12
