SUMMARY

Entry-level SOC candidate with hands-on log monitoring and alerting in a Graylog lab, Wireshark-based traffic analysis, and internship-driven vulnerability reporting that turned SAST data into clear remediation views. Brings Python-driven reporting, Linux and Windows fundamentals, and clear security communication for stakeholders.

SKILLS

- | | | |
|-------------|--------------------------------------|----------------------------------|
| • Graylog | • Linux administration | • Python |
| • rsyslog | • Windows Server troubleshooting | • Excel / XLSX automation |
| • NXLog | • Vulnerability management | • Stakeholder communication |
| • Wireshark | • SAST report ingestion and analysis | • Incident response fundamentals |

EXPERIENCE

Nonprofit Healthcare Organization, Project Consultant

2026-01 – 2026-05 • Tulsa, OK

- Presented migration risks, security considerations, and rollout recommendations to technical and non-technical stakeholders, helping leadership understand potential vulnerabilities and escalation paths.

Self-directed / Independent, Security Automation Projects

2026-01 – Present • Remote

- Designed security-focused automation workflows for vulnerability discovery and remediation tracking using structured logs, alerting, and approval gates to improve visibility across automated systems.
- Built security monitoring and approval-gate workflows to detect automation failures, flag risky actions, and route remediation steps through human review.

Dillard's, Information Security Intern

2025-05 – 2025-08 • Little Rock, AR

- Helped build a SAST reporting workflow that ingested findings from GitLab repositories and converted raw scanner output into clean Excel reports with severity breakdowns, team and repository views, and visual summaries for stakeholders.
- Correlated vulnerability details such as severity and logging dates to improve visibility into remediation priorities.
- Translated technical vulnerability findings into actionable reporting for decision-makers.

Accurate Interpretations, Technical Operations Intern

2024-05 – 2024-08 • Lawton, OK

- Performed onsite network traffic analysis with Wireshark to identify anomalies, support troubleshooting, and strengthen secure network operations.

EDUCATION

- | | |
|---|-------------------------------|
| Bachelor of Science in Computer Information Systems , The University of Tulsa | in progress, expected 2026-05 |
| Master of Science in Cybersecurity , The University of Tulsa | in progress, expected 2026-12 |

CERTIFICATIONS

- | | |
|-------------------|---------|
| CompTIA Network+ | 2024-08 |
| CompTIA Security+ | 2025-12 |
